

GOING GREEN BIO-BASED FOAM

As the necessary focus on environmental preservation continues to grow throughout the world, Foamcraft has responded by enhancing

our product line to demonstrate our dedication to the well being of the planet, and the complete satisfaction of our customers.

Advanced Technology

The technology of urethane chemistry has advanced to the level where bio-based polyols can be utilized without the loss of physical property performance. This is a critical step in the mission of providing environmentally friendly foam products at competitive prices while maintaining a superior quality product.
